

HISTORY

of the

UNIVERSITY ARCHITECT'S OFFICE

COMPILED

BY

WILLIAM E. SCEVA, B. ARCH. '53  
ASSOCIATE UNIVERSITY ARCHITECT

AUGUST 1969

## PREFACE

One frequently hears the time-worn phrase "history repeats itself." In reviewing the history of the University, it is noted that the same problems still exist relative to completion of projects on schedule, disturbance to occupants, labor strikes, and charges to architects to design projects within the assigned budget. It seems only the cast of characters has changed.

In Volume I of "History of the Ohio State University," Captain Cope describes the failure of the contractor to complete University Hall by the September 17, 1873, deadline as follows:

"The one building whose doors were opened (figuratively, only, for most of the doors were not yet in place) now known as University Hall was surrounded by piles of brick, lumber, sand, lead and iron pipe, and the like, rejected and yet to be used material for the building which the contractor, after the fashion of his kind, had failed to complete by the date agreed upon."

Captain Cope also noted:

"The fitting of the lecture rooms and laboratories was a slow process. Carpenters and plumbers had to be driven and lectures and recitations were frequently disturbed by the noise of hammer and saw."

The history records the following regarding the Law Building in September, 1902:

"The contractor had employed nonunion painters, whom he had brought from Sandusky, and union labor of Columbus demanded their discharge and the employment of only union men. This demand was, of course, refused, and on September 15, 1902, one of the Columbus papers printed an article stating that the Trades Assembly of the city had decided on aggressive action, and that next morning 1,500 union workmen would march to the building and throw out the nonunion men by force. The report caused some anxiety, and alarm. Conferences took place between the University authorities, the contractor, the architect, and the men, and it was decided to hold the ground and await developments. As an incident to this trouble, Mr. Lewis Fink, a leading painter of Columbus, voluntarily appeared on the scene to say to the contractor that if there was any trouble, he, Fink, had twenty nonunion painters whom he could place on the work, and who would fight any force brought against them. But the march of the 1,500 men did not take place, and the only result of the Trades Assembly meeting was the

appearance of a few union workers, and an effort on their part to get the contractor's painters and other workmen to strike. As soon as their purpose was known they were ordered out of the building, and the trouble was there ended."

In 1902, at the June Board of Trustees meeting, an ambitious building program was outlined which included a budget of \$125,000 for a new physics building. At the July Board meeting the budget for the building was revised to be \$120,000 for a completed building but the initial building should not exceed \$80,000. At the August meeting the architect presented plans with an estimated cost of \$130,000 for a total building. A committee was appointed to examine the plans and make eliminations so as to make the cost of the initial structure fall within the allotted \$80,000.

August and September passed and the plans were not completed until November 1, and the cost still exceeded the budget; however, the University on November 5 presented them to the Governor for approval who, after conferring with his aides, deferred approval until the other capital improvements had been finalized. The subject of the physics building plans came up for discussion at the April and June, 1903, meeting and the University on June 11 presented them to the Governor for his reconsideration. At this presentation, the Governor rejected the plans on the basis of the cost exceeding the budget.

By August 15 the plans were revised and approved by the State officials. It was not until December 21, 1903, that contracts were awarded. (While these perplexing problems over the plans were occurring, there was also a prolonged controversy over the building location.)

Sources of material for the following were the "History of the Ohio State University" Volumes I and II, the Alumni Monthly, the Annual Reports of the Board of Trustees of The Ohio State University, records of the Office of the University Architect and interviews with retired staff members.

The writer is grateful for the assistance of Mr. William H. Harsh for researching the archives for material and for conducting the personal interviews of retired staff members, and for the assistance of Mrs. Michael P. Garvic for typing the manuscript.

William E. Sceva

## THE BRADFORD YEARS

From March 10, 1871, when the plans of Architect J. Snyder of Akron, Ohio, were approved for University Hall, until August, 1911, the Board of Trustees of necessity had to select an Architect each time the General Assembly made an appropriation. To be free of this time consuming task and in view of the coming era of new building construction on the campus, the position of University Architect was created with an Architect's Advisory Board of seven members.

Professor Joseph Nelson Bradford was elected University Architect and to the Advisory Board were appointed University President William Oxley Thompson, Superintendent of Power Plant, Professors Edward Orton, Embury A. Hitchcock, Thomas E. French, and Clyde T. Morris, and Wendell Paddock, Landscape Architect. The special duty of the Architect and Board was to secure an orderly development of the Plant and the beautification of the grounds. (In 1915, the Advisory Board was dispersed with and some of its duties being transferred to the Cabinet consisting of the President, the Business Manager, the University Architect, and the Superintendent of Buildings and Grounds.)

Professor Bradford was born April 3, 1860, in a miner's cabin in California. This was a long way, time wise and geographically, from his graduation from the Ohio State University in 1883, with a degree in Mechanical Engineering. History notes the first musical organization of the military department was a drum and bugle corp which was in the charge of First Sargent J. N. Bradford.

Professor Bradford's first position upon graduation was draftsman with the Pennsylvania Railroad. In 1885, he was appointed as assistant to Professor Stillman W. Robinson in the Department of Mechanical Engineering and was made an instructor in Mechanical and Freehand Drawing. He then served in every faculty post from instructor to professor. Among his accomplishments prior to being appointed University Architect were the establishment of a photography class in 1890, in which he worked with Professor Nathaniel W. Lord on the development of a flash pan for better illumination, and the creation of a "course" in Architecture in 1896. In 1906, the Department of Architecture was established with Professor Bradford as its first chairman.

The selection of Professor Bradford as University Architect in 1911, was a most logical appointment in view of his service to the Board and his leadership in the Department of Architecture. In 1895, Professor Bradford and Professor Lord presented plans and specifications and estimates of cost for a building for an astronomical observatory. He was appointed project architect and superintendent of construction. (The building was subsequently named McMillen Observatory.) In 1902, he served on the committee which developed the plans and specifications for the Engineering Building (later

named Brown Hall). In 1903, he presented plans and specifications for a building for a laboratory on Lake Erie.

Early in the history of the University, there had been a plan which, though informal, would have served for a group of perhaps a dozen buildings. Since this plan had been outgrown and on the basis of a report by the renown brother team of the Olmsteads, the University Architect's first assignment was to develop a "map" showing the existing buildings, walks, and drives, and presenting a scheme for an orderly development. There continued to be an abundance of work for the staff and the University Architect. The following is a table of projects under the supervision of the University Architect. (Costs are exclusive of equipment and Architect's fees.)

BUILDINGS ERECTED UNDER SUPERVISION OF  
PROFESSOR JOSEPH N. BRADFORD

<u>BUILDING</u>	<u>YEAR</u>	<u>TOTAL COST</u>
Implement Barn	1912	\$ 9,912
Poultry Buildings	1912	2,753
Archaeological Museum	1913	95,107
Store Room	1913	11,700
Botany & Zoology	1914	123,821
Horticulture & Forestry	1914	146,793
Physics Building Addition (East Wing)	1915	41,627
Freight House and Kiln Room	1915	12,976
(4) Greenhouses for Horticulture & Forestry	1913	9,758
(8) Greenhouses for Botany & Zoology	1915	4,330
Homeopathic Hospital	1916	54,937
Small Animal Building	1916	3,000
(5) Greenhouses for Horticulture & Forestry	1916	10,897
Aviation Laboratory	1917	39,408
Barracks Group	1917	45,263
Campbell Hall	1917	146,459
Ohio Union Addition	1917	11,359
Shops Building	1917	112,584
Lord Hall Kiln House	1918	24,172
Aviation Post Hospital	1919	21,773
Power House (See Figure #1)	1919	115,203
Artillery Horse Stable	1921	8,293
Stadium	1921	1,300,000
Artillery Cottage	1922	4,715
Beef Cattle Barn	1922	27,051
Chemistry Building (Sawtooth)	1922	87,916

Research Animal Building	1923	71,358
Service Building Addition	1923	
Chemistry Building	1924	188,848
Hamilton Hall and Addition	1924	219,239
Horticulture Greenhouse No. 9	1924	8,765
Journalism Building	1924	95,968
Studio Building	1924	11,254
Administration	1925	439,093
Agricultural Engineering	1925	128,523
Archaeological Museum Addition	1925	240,488
Robinson Laboratory Addition	1925	102,285
Animal Husbandry Building	1926	180,890
Farm Flock House No. 1	1926	3,783
Education Building	1926	342,371
Engineering Experimental Station	1926	174,420
Horticulture Greenhouse No. 7 and No. 18	1926	11,942
Poultry Plant (Poultry Practice and Commercial Flock House)	1926	13,788
Farm Flock House No. 2	1926	2,534
Four Laying Houses	1926	2,667
President's House	1926	67,572
Starling Loving Hospital	1926	490,577
Stone Laboratory	1926	17,911
Artillery Stables Addition	1926	9,043
Field House	1927	25,220
Hamilton Hall Addition	1927	168,676
Pomerene Hall Completion	1927	299,011
Power House (Pump House Addition)	1927	10,587
Hospital Addition	1927	144,181
Chemistry Building Addition	1928	303,028
Stone Laboratory Completion	1928	51,937
Stadium Lockers and Toilets	1928	14,618

<u>BUILDING</u>	<u>YEAR</u>	<u>TOTAL COST</u>
Archaeological Museum Addition	1929	\$ 133,206
Chemistry Building Addition	1929	207,025
Derby Hall Remodeling and Addition	1929	412,997
Farm Barn	1929	14,742
Power House Addition	1929	172,785
Small Animal Building	1929	14,163

As Professor of Architecture and Drawing, Professor Bradford had his office in Room 106, Brown Hall. In 1911, when he became University Architect, his working space was limited to that office until 1912, when a janitor's closet and ladies toilet were remodeled into a blueprint vault and a stenographer's room. A portion of a drawing room was remodeled to become a drafting room for the University Architect. In 1921, the north addition was added to the west end of the building. At that time, an enlarged drafting room (see Figure #2) was provided in the new wing and the space in the old building was rearranged to compliment the new drafting room.

In the spring of 1921, the Stadium project was taking shape. At the May 24 Board of Trustee meeting, Dr. Thompson submitted a special report by a consulting firm which warmly approved the overall plans submitted by Howard Dwight Smith, the architect and Clyde T. Morris, engineer. It is interesting to note that this project, which was developed during the tenure of Professor Bradford, was assigned to the team of Professors Smith and Morris to oversee. Special quarters in the Industrial Engineering Building were assigned to the staff working on the Stadium project. Room 119 was made a drafting room and Room 118 was assigned to the principal designer. Figure #3, taken in February 1921, records the work in progress. An earlier photograph, Figure #4 taken in September 1920, shows a group at work in Brown Hall on a plaster of Paris model of the Stadium.

The University Architect's Office has, through the years, provided an opportunity for students, draftsmen, and architects to serve their alma mater as well as gain practical experience which has stood them well in their future endeavors in private architectural firms. The staff of the office during the Bradford era was as follows:

1912

Joseph N. Bradford  
Herbert Edwards  
Coletta Kelley

University Architect  
Clerk of the Works  
Stenographer

1913

Joseph N. Bradford  
Ray Sims

Professor Bradford retired in 1929, as University Architect. He then set about the task of assembling a photographic history of the University and devoting time to painting, his avocation during undergraduate years. Professor Bradford passed away during the school year 1943-44. On May 17, 1963, Professor Bradford's long service to the University was recognized by the University Board of Trustees by designating Bradford Commons as the official name for a dining facility in the south dormitory complex.

## THE SMITH YEARS

In October 1929, Professor Howard Dwight Smith was appointed University Architect. Professor Smith, a native of Dayton, Ohio, received degrees in Architecture from the Ohio State University in 1907, and from Columbia University in 1910. Professor Smith practiced Architecture in the Office of the Supervising Architect of the United States Treasury Department and with the renown architect John Russell Pope in New York City.

Professor Smith returned to Ohio State in 1918, for a three year period as Professor of Architecture. During that time, he also found time to serve as designer for the Ohio Stadium, the design of which won the 1921 Gold Medal of the American Institute of Architects in the public building classification. In 1921, Professor Smith resigned to become Architect for the Columbus, Ohio Board of Education which was planning a \$10,000,000 school expansion program which required eight years to complete.

Some of Professor Smith's outstanding projects in private and consulting practice in addition to the Columbus schools were Springfield Masonic Temple, Wittenberg Stadium, Marietta City Hall, Columbus YMCA, Columbus City Hall, some 25 other schools throughout central Ohio and some 50 apartment and residences in Franklin County.

The following is a table of campus projects erected under the supervision of Architect Smith:

### BUILDINGS ERECTED UNDER SUPERVISION OF PROFESSOR HOWARD DWIGHT SMITH

<u>BUILDING</u>	<u>YEAR</u>	<u>TOTAL COST</u>
Gymnasium	1930	\$ 496,311
Natatorium	1930	314,960
Physical Education	1930	496,311
Teacher's Training (University School)	1930	424,232
Social Administration Building (Stillman Hall)	1935	437,765
Golf House	1937	42,203
Baker Hall - PWA Project	1937	875,000
Journalism Building	1938	149,514
Women's Dormitory	1939	421,536
Faculty Assembly	1939	170,262
Feeding Barn	1940	57,318
Implement Barn	1940	2,543
Poultry Plant	1940	80,600
Military Science	1941	71,325
Hamilton Hall Medical Library	1942	99,672

<u>BUILDING</u>	<u>YEAR</u>	<u>TOTAL COST</u>
Airport Shop and Hangar	1942	\$ 36,951
War Research	1942	185,143
Additions to Airport	1943	71,616
Cyclotron Laboratory	1944	130,996
Research Foundation	1945	27,012
Research Foundation Laboratory	1947	
Veterans Education Facility	1947	186,610
Emergency Housing I	1947	97,177
Emergency Housing II	1947	44,190
Emergency Housing III	1947	149,190
Botany & Zoology Addition	1947	516,753
Hughes Hall	1947	933,084
Central Service Building	1947	928,193
*Hagerty Hall Addition	1947	1,090,181
*University Hospital	1947	4,983,000
*Dentistry Building	1947	1,231,000
*North Wing, Cancer Research Clinic	1947	658,097
Physics Building	1948	1,102,322
*Caldwell Laboratory (Electrical Engineering Building)	1949	676,748
*Student Union	1949	3,383,521
Agricultural Laboratory	1949	958,634
Optometry Building	1949	273,769
Main Library Addition	1950	2,488,174
Women's Dormitory (Bradley-Patterson)	1952	2,980,320
St. John Arena	1953	3,111,900
French Field House	1954	964,504
Antenna Laboratory - Kinnear Road	1954	214,448
W.O.S.U. TV Station	1954	123,257
Siebert Hall	1954	1,266,930
Mershon Auditorium	1954	2,443,070

\*Projects were developed by off campus associate architects.

In 1921, Professor Smith was instrumental in obtaining the Corinthian capital which is located in front of Brown Hall. A personal friend of Professor Smith salvaged the artifact from one of the six columns on the portico of the Madison Square Presbyterian Church in New York City which had been recognized as one of the architectural masterpieces of the famed Stanford White of the firm of McKim, Mead and White.

In 1933, during the heart of the Depression when building activities at Ohio State University were at a minimum, Professor Smith designed a pattern of growth for the University. Basically, this campus development plan is being followed despite the current rapid building pace.

One of the features of the pattern was the axis around which the campus figuratively would rotate. This axis consists of Fifteenth Avenue extended with the only all stone buildings on the campus as anchors. These buildings are the Library at the base of the oval and two structures at the Fifteenth Avenue and High Street entrance the museum and the new Mershon Auditorium.

The staff of the University Architect's Office during Professor Smith's tenure was as follows:

1930

Howard D. Smith	University Architect
Harry F. Reichard	Associate Architect
Melvin C. Josephson	Landscape Architect
Kyle W. Armstrong	Structural Designer
Marion A. Carter	Superintendent of Construction
Paul Crider	Draftsman
A. J. Friday	Draftsman
Mary Louise Charch Shidecker	Draftsman

Professor Smith was a member of the Ohio Society of Architects, held a fellowship in the American Institute of Architects, a member of the National Joint Co-operation Committee of the American Institute of Architects, and the Association of General Contractors, one of the organizers of the Association of University Architects, Architectural Advisor to the American Commission for Living War Memorials, consulting Architect for the Upper Arlington Board of Education, and a member of Sigma Ki, scientific honor society.

Some of Professor Smith's publications include: "Planning for Post-War College and University Construction," in the 16th annual edition of the American School and University; "The Architect as an Administrative Officer," in the 19th edition; two brochures on "Memorials That Live" for the American Committee for Living War Memorials; a paper, "Thomas Jefferson, Gentleman-Architect"; and an article in the September, 1955, issue of the Journal of the American Institute of Architecture on "Architectural Integrity of the College Campus."

Professor Smith made many trips abroad to sketch and study architecture of past eras. It was in this same spirit of adventure that he requested a leave of absence for the academic year of 1955-56 to serve as a lecturer on Architecture at Alexandria University in Egypt under the Fulbright Award.

During Professor Smith's absence, Mr. Harry F. Reichard, Associate University Architect, served as Acting University Architect. Meanwhile, plans were drawn and contracts let to remodel a portion of the Research Center (a building which previously had been the Ohlen-Bishop factory) as a new office for the University Architect. This space allowed for expansion and a better relationship of work areas to one another. In addition to being air conditioned, the working environment was greatly improved as is evidenced in Figures #5 and #6.

Upon his return to campus, Professor Smith was awarded The Ohio State University Distinguished Service Award at the June, 1955, commencement. He indicated his desire to be relieved of his duties and subsequently retired officially in June, 1956. On September 1, 1958, the University Board of Trustees, as further recognition of Professor Smith's service to the University, designated that the third high-rise dormitory along Tenth Avenue be officially named Smith Hall.

## THE LINCH YEARS

In February, 1956, Mr. William E. Linch was appointed University Architect to replace the retiring Professor Smith. Mr. Linch, a native of Steubenville, Ohio, was an Ohio State graduate of the class of 1921, with a degree in architectural engineering. Prior to graduation, he served as a Second Lieutenant in the Coast Artillery stationed at Fort Worden, Washington, and at Fort Monroe, Virginia. He had been a member of the Glee Club, Scarlet Mask, Strollers (of which he was president) and the Alpha Tau Omega fraternity.

Upon graduation, Mr. Linch was employed in the Office of State Architect. During 1924, and 1925, Mr. Linch journeyed to New York City to gain experience in the offices of York & Sawyer, noted at that time for hospital designs. In 1926, he returned to Columbus and worked for three years with Robert S. Harsh and Associates. In 1929, he established his own office for the practice of Architecture. From 1930, he spent the next 14 years in the Office of the State Architect. In 1945, he joined the firm of Sims, Cornelius & Schooley headed by Mr. John Schooley who had been State Architect. (Incidentally, Mr. Ray Sims had been Chief Draftsman on the staff of the University Architect in 1913, 1914-15, and 1916.) He continued with this firm until his appointment as University Architect.

Mr. Linch is active in American Institute of Architect having served as president of the Columbus Chapter in 1951-52. He also is a member of the Association of University Architects, a dedicated member of the Rotary Club and of the Masonic Lodge, and is one of the few men in the Columbus area to receive the 33d Degree. The new addition to the old Grand Lodge Building in Worthington, Ohio, was of his design and has received wide acclaim as a very successful wedding of a modern structure to one with a most historic background.

In 1957, a Council on Business Affairs was established with the Vice President and Business Manager as chairman, and the University Architect as one of the members. The University Architect's seat in this Council was in lieu of sitting in on the President's Cabinet which was being reorganized to consider more academic affairs rather than being primarily of a business nature. Early in 1965, the Council on Business Affairs was dissolved and all business relative to the University Architect's Office was dealt with directly by the Vice President for Business and Finance.

The following table of campus projects were erected under the supervision of Architect Linch:

BUILDINGS ERECTED UNDER SUPERVISION OF  
MR. WILLIAM E. LINC

<u>BUILDING</u>	<u>YEAR</u>	<u>TOTAL COST</u>
Kinnear Road Research Laboratory	1955	\$ 730,218 <sup>8</sup>
Park Hall, Smith Hall, Stradley Hall	1955	5,797,177
*College of Agriculture - Classroom and Administration Building	1955	1,133,283
*Sisson Hall - 1st Section	1955	1,117,966
*College of Law	1955	748,773
*Diagnostic Addition - University Hospital	1955	546,871
*University Hospital - North Wing, III	1955	3,045,132
*Mereshon Parking Facility	1955	589,744
*College of Law - Complete Building	1956	1,451,430
*Sisson Hall Auditorium	1956	401,037
*Goss Laboratory	1956	2,070,508
*College of Agriculture - Auditorium Addition	1956	1,214,530
*Animal Science Building	1956	1,285,233
*Engineering Classroom - Office	1956	2,171,062
*Chemical Engineering Building	1956	1,851,035
*Denney Hall	1956	2,030,923
*Addition to Evans Laboratory	1956	2,166,078
*Addition to Alpheus Smith Laboratory	1956	873,697
*Fine Arts	1956	1,036,342
Steeb Hall	1957	3,149,428
Aeronautical Engineering	1957	70,491
Van de Graaff Laboratory	1957	71,243
Service Building Shops	1957	591,000
*Dentistry, 4th Floor	1957	1,273,016
*Arps Addition	1957	1,371,140
*Wiseman Hall	1957	900,000
*Radiation Therapy	1957	515,000
*Poultry Science	1957	129,901
*Married Student Housing Complex	1957	1,660,015
Water Resources Research	1958	182,718
Reactor Building	1958	93,874
Robinson Laboratory Remodeling	1959	787,099
Pomerene Hall Kitchen Remodeling	1959	198,895
Botany & Zoology Addition	1959	1,062,071
McPherson Remodeling	1959	225,672
Morrison Tower	1959	1,627,375
Golf Course - Maintenance Building	1959	27,966
*"T" Hangars	1960	167,423
Campbell Hall Addition	1960	687,354
*Fine Arts Addition	1960	914,368
Barrett House, Halloran House	1960	1,115,430
*Ice Rink	1960	351,943

<u>BUILDING</u>	<u>YEAR</u>	<u>TOTAL COST</u>
Royer Commons	1961	\$ 617,765
Bradford Commons	1961	502,975
Drackett Tower	1962	2,488,637
*Civil & Aeronautical Building Addition	1963	2,617,000
Materials Engineering & Science Building	1963	2,304,000
*Electrical Engineering Research Facilities	1963	542,881
North Commons	1963	1,078,550
*Pharmacy Building	1964	3,400,000
*Chemistry Research Facilities	1964	1,577,943
*Electronics Laboratory	1964	3,231,773
*Systems Engineering	1964	2,998,400
*Morrill Tower, Lincoln Tower	1964	16,798,907
*Dayton Campus - Science Building	1964	2,652,740
Raney Commons	1964	1,034,900
Motor Pool Garage (Garage, Paving, Utilities)	1964	277,000
Houck House	1964	751,330
*Parking Ramp - Student Union Area	1964	1,353,000
*Parking Ramp - Arps Hall Area	1964	1,060,000
Taylor Tower	1964	2,799,500
*Antenna Laboratory-Control Facility at the Saucer Laboratory	1964	140,300
*Center For Tomorrow	1964	5,852,500
*General Academic Facility - Lima Campus	1964	2,060,000
*General Academic Facility - Mansfield Campus	1964	2,200,000
Nosker Hall and Archer Hall	1964	1,460,800
*Dayton Branch, Phase III	1964	2,490,000

\*Projects were developed by off campus associate architects.

The staff of the University Architect Office during Mr. Lynch's era was as follows:

1957

William E. Lynch	University Architect
Harry F. Reichard	Associate Architect
Paul D. Morrill	Architect
Lam Woo	Architect
William E. Sceva	Architect
George Tilley	Architect
Richard E. Murray	Architect

In 1965, Mr. Lynch was nearing the age of 70 and indicated his wishes for retirement. In October, Professor Hollie W. Shupe was appointed University Architect.

Upon his retirement, the University Board of Trustees awarded Mr. Lynch the title of University Architect Emeritus. Mr. Lynch continues part-time service to the Office of University Architect as a consulting architect with an office in the building at 1315 Kinnear Road.

## THE SHUPE YEARS

Professor Hollie W. Shupe, a native of Columbia Center, Ohio, graduated from Ohio State University in 1936, with a bachelor of architecture degree. As an undergraduate, he was elected to the freshman honorary Phi Eta Sigma and to the engineering honorary Tau Beta Pi and also belonged to the Alpha Rho Che, the architectural fraternity. In his senior year, he was awarded the American Institute of Architects school medal.

Professor Shupe retired from the U. S. Army Reserves as a lieutenant colonel and holds the Bronze Star Medal with "V" device, the Air Medal, the Presidential Unit Citation with Star and the Distinguished Unit Citation with oak leaf cluster, all earned during service in the Pacific during World War II.

Professor Shupe's early professional experience included research in early American architecture. Professor Shupe, a registered engineer in addition to being a registered architect, has been associate of Pettit and Oman and Ralph Kempton of Columbus, and Charles Marr of New Philadelphia, and has also been a senior engineer for North American Aviation of Columbus. At various times from 1937, to 1952, he was an architect and designer in the University Architect's Office working on such projects as Canfield Hall, Vivian Hall, and the cancer wing of the University Hospital. Between 1958, and 1965, he was an architectural consultant for Bender and Associates of Columbus.

At Ohio State, Professor Shupe advanced from instructor to professor by 1948, while in the Department of Engineering drawing. He is co-author of four text books and workbooks used by students in the field of engineering graphics.

Professor Shupe holds memberships in the American Society for Engineering Education, the National Society for Professional Engineers, the American Institute of Architects, Association of University Architects, is past president of the University Faculty Club, and is a past commander of The Ohio State University American Legion Post 310.

A list of the campus projects developed under the supervision of Professor Shupe is as follows:

### BUILDINGS ERECTED UNDER SUPERVISION OF PROFESSOR HOLLIE W. SHUPE

<u>BUILDING</u>	<u>YEAR</u>	<u>TOTAL COST</u>
*School of Nursing	1965	\$2,400,000

<u>BUILDING</u>	<u>YEAR</u>	<u>TOTAL COST</u>
OSU Service Center - Phase I - Laundry	1965	\$ 215,000
*Basic Science Building	1965	12,000,000
*Lima Campus - Phase II	1965	1,027,828
*Marion Campus	1965	1,952,857
*General College - Building #1	1965	3,011,447
*Humanities Center - Language Building	1965	2,203,000
*Biological Sciences Building	1965	8,384,133
*Dayton Campus - Phase IV - Science Building 2	1965	3,000,000
*Mansfield - Phase II	1965	1,050,000
*Newark Branch Campus	1965	2,312,222
Horticulture, Forestry & Food Technology Center	1965	3,500,000
Athletic Facility North	1965	625,000
